

HOMICUBE PLAYBOOK

The Client Portal Walkthrough

A 5-minute tour your salespeople can use to close clients by showing — not telling — what transparency looks like.

01 · The login link

Every client gets a unique tokenised link — no password to remember. Send it on WhatsApp the moment you mark the lead Won.

homicube.app/portal/{token}

Tokenised, revocable, expires when project archives

Mobile-first design

Works on the cheapest Android phone in 2G zones

'Save as app'

Add-to-home-screen — sits on the client's home like Instagram

Talking point

'No password to forget. We'll WhatsApp the link the day you pay the advance.'

02 · The milestone tracker

The first thing every client clicks. Shows the 6-stage timeline of their project with completed dates and target dates.

Design Approved · Done · Apr 8 Green tick + actual date
Material Delivered · Done · Apr 14 Photo count badge — 8 photos uploaded
Carpentry · In progress Live shimmer, with target Apr 28
Polish · Upcoming Estimated dates auto-shift if previous slips
Talking point 'Sir, you'll know the day a milestone slips — same day, not at handover.'

03 · Live photo gallery

Site supervisor uploads from mobile. Client sees within seconds. Most powerful trust-builder you'll ever ship.

Pre-stage: Empty site Day 1 reference photos
Stage 1: Carcass Tagged 'BWP Greenply 18mm' — proof of brand
Stage 2: Shutter fitting Hettich hinges visible, photographed close-up
Stage 3: Polish Final finish samples
Talking point 'Open this with your wife in Bangalore — she'll see the same site you saw yesterday.'

04 · Quotation, BOQ, agreements

All paperwork lives in the portal. PDF, downloadable, version-tracked. No more 'I lost the WhatsApp PDF'.

Quotation v3 (latest) · Approved Old versions visible too — full transparency
BOQ · 142 line items Brand-locked: every line shows the chosen brand
Agreement · Signed Auto-generated · digitally signed via OTP
Warranty card Generated at handover · 10 years from that date
Talking point 'Every paper we sign sits here forever — even after handover.'

05 · Payments & invoices

Milestone-linked payments. One-click Razorpay link. Receipts auto-generate. GST-compliant invoices on demand.

Advance · ■85,000 · Paid Apr 1 UPI · auto-receipt sent
Carpentry milestone · ■2,40,000 · Due Apr 28 Pay button → Razorpay → instant receipt
Outstanding: ■1,55,000 Auto-reminder on Day 28 if unpaid
All invoices · GST 18% Downloadable for income tax / company books
Talking point 'No more bank transfer screenshots. Tap, pay, receipt arrives in 4 seconds.'

06 · WhatsApp + portal: the closing line

End every demo with this. It works because it's true.

'Sir, the contractors who don't have this — they're not hiding the site, they're hiding the chaos.'

Pause. Let it land.

'You'll know more about your project than my own designer does.'

Smile. This is the moment.

'And the day a milestone slips — you'll see it the same day.'

Hand them the iPad. Let them tap around for 60 seconds.

'Ready to start?'

If they say yes → payment link in 30 seconds. If they hesitate → 'Want me to send this exact demo to your wife on WhatsApp?' That's the second close.
